

# Jake Cunningham

---

jakehcunningham@outlook.com

<b>Interests</b>	My research interests are in developing Bayesian machine learning methods with a particular focus on applications in climate science and oceanography.	
<b>Education</b>	<b>Ph.D. Machine Learning</b>	2021-Present
	University College London, Department of Computer Science <i>Supervisor:</i> Marc Deisenroth - Currently researching efficient inference techniques for Gaussian processes, neural stochastic processes and generative models.	
	<b>M.Sc. Computing (AI and Machine Learning)</b>	2020-2021
	Imperial College London, Department of Computing <i>Research Project:</i> Stochastic Partial Differential Equations and Gaussian Processes <i>Supervisor:</i> Mark van der Wilk <i>Grade:</i> Distinction 82.8%	
	<b>M.Eng. Engineering Science</b>	2016-2020
	University of Oxford, Keble College, Department of Engineering <i>Research Project:</i> Modelling Global Distribution of Floating Microplastics <i>Supervisor:</i> Ton van den Bremer <i>Grade:</i> First Class Honours 75.6%	
<b>Publications</b>	<b>H.J.Cunningham</b> , D.de Souza, S.Takao, M.van der Wilk, M.P.Deisenroth. Actually Sparse Variational Gaussian Processes. <i>Proceedings of the International Conference on Artificial Intelligence and Statistics (AISTATS)</i> , 2023	
	<b>H.J.Cunningham</b> , C.Higgins, T.S.van den Bremer. The Role of the Unsteady Surface Wave-Driven Ekman–Stokes Flow in the Accumulation of Floating Marine Litter. <i>Journal of Geophysical Research: Oceans</i> , 2022	
<b>Employment History</b>	<b>National Oceanography Centre</b>	2022-Present
	<i>Research Engineer</i> - Work on improving the detection and tracking of mesoscale eddy currents. - Trained a neural diffusion process to generate a probabilistic model of ocean currents.	
	<b>Mercury Labs</b>	2021-Present
	<i>Data Scientist</i> - Designed zero-shot recommender systems for low-traffic small businesses. - Built a product embedding model for cross-site product comparisons.	
	<b>Waves and Flows Research Group, University of Oxford</b>	2020
	<i>Research Assistant</i> - Modelled geophysical fluid dynamics of the upper ocean. - Performed large particle tracking simulations to model the global distribution of floating microplastics.	
	<b>AMR International</b>	2019
	<i>Strategy Consultant</i> - Built quantitative models to assess investment risk.	
<b>Reviewing</b>	- AISTATS 2022 - Gaussian Processes, Spatiotemporal Modeling, and Decision-making Systems, Workshop, NeurIPS 2022	

<b>Awards</b>	<b>Imperial Computing Distinguished project</b>	2021
	- Awarded for outstanding individual projects in terms of technical achievement.	
	<b>Challenger Society for Marine Science Student Award</b>	2020
	- Awarded for demonstrating excellence in Marine Science Research.	
	<b>Keble College Franklin Award</b>	2020
	- Awarded for best overall performance in 4th year Engineering Science.	
	<b>Keble College Academic Scholarship</b>	2018-2020
<b>Technical Skills</b>	<b>Languages</b>	
	Python, Matlab, Julia	
	<b>Machine Learning Frameworks</b>	
	PyTorch, TensorFlow, JAX, GPflow
